## DEVELOP NEW ARTERIAL OSCILLOGRAPH

COMPLEX BRIGADE PROPOSES NEW INSTRUMENT -- Leningradskaya Pravda, 12 Aug 50

The Leningrad Krasnogvardeyets Plant has several complex brigades. These are active groups of stakhanovites and engineering-technical workers joined in creative collaboration. These brigades have settled very complicated problems in improving the organization of labor and the quality of output.

Particular success has been attained by the brigade composed of engineers, stakhanovites, and the chief of the experimental shop. It proposed to produce a new, more accurate, and more sensitive model of arterial oscillograph for recording blood pressure. When the instrument was tested, it showed excellent results. A very favorable report was made by a corresponding member of the Academy of Medical Sciences. It answers present-day medical requirements, is convenient to use, accurate, dependable, and less expensive to produce.

The brigade has produced 50 of these instruments during the past month. It is now developing a double-loop oscillograph for determining blood pressure simultaneously at two points in the body.

MAKES APPARATUS FOR SCHOOLS, LABORATORIES -- Vechernyaya Moskva, 4 Aug 50

The Moscow Fizelektropribor (Physics and Electrical Apparatus) Plant of the Ministry of Education RSFSR has recently put 22 new items into series production. The plant, which supplies schools and laboratories, finished its July plan ahead of schedule and won the Transferable Red Banner of its ministry.

MOSCOW INSTRUMENT STRIVES TO BECOME STAKHANOVITE PLANT .-- Vechernyaya Moskva, 9 Aug 50

The Moscow Instruments Plant is one of the leading enterprises in the capital. Its production process is completely mechanized. It consistently exceeds its production program and is well on the way toward becoming a Stakhanovite plant

For the second quarter it captured first place in the all-Union socialist

competition, and won the Transferable Red Banner of the All-Union Central Council of Trade Unions and the Ministry of Machine and Instrument Building.

The assembly shop has two conveyers for collecting alternating and direct current instruments. An instrument leaves the conveyer every 35 seconds. It is tested, wrapped, and passes through a trap door into the warehouse.

The assembly and storage shop, particularly the core section, has done especially good work.

During a 6-month period, the plant made one million rubles of above-plan profit.

PLANT SELIS CHEMICAL EQUIPMENT -- Vechernyaya Moskva, 8 Aug 50

The  $/\overline{\text{M}}$ oscow? Chemical-Machine-Building Plant is selling, from its supply of chemical apparatus, VIME-2 oil regenerating installations and laboratory press filters.

For information contact Dom 14, Panskaya Ulitsa; telehone: D 3-15-08, extension 1-10 or 1-11. -- Advertisement

SELLS GLASS TUBING -- Vechernyaya Moskva, 8 Aug 50

The Klin Laborpribor Plant is selling on a noncash basis glass tubing from 6 to 50 millimeters in diameter, at catalogue prices. Address: 13 Sestroretskaya, Klin, Moscow Oblast. -- Advertisement
